EDUCATION

SRM Institute of Science and Technology - Chennai, India
Bachelor of Technology, Computer Science Engineering (AI&ML)

2028
9.81/10

SKILLS

Languages: Python, Java, JavaScript, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS

Technologies/Frameworks: FastAPI, PyTorch, LangChain, Tensorflow, LLM Fine Tuning, n8n

Tools and Technology: AWS, Render, Git, Github, Docker(Basic), Hugging Face

EXPERIENCE

ML Research Intern | SRM University (UROP)

Sep. 2025 – Present

- Analysed **30+ research paper** on the EEG and Early Alzheimer Detection
- Architected the ML Model(Random Forest) with **93%** accuracy for Pattern detection using CNN

Business analyst and Backend Intern | Medgency (Health-Tech Startup)

Dec. 2025 – Present

- Worked with **6+ cross-functional teams** to translate business requirements into structured user stories and process flows used by product and engineering teams.
- Developed OCR based medical prescription system for automated medicine fetching and display.
- Identified workflow inefficiencies and supported product decisions through requirement analysis and documentation.

Technical Member(AIML) | Team Envision(Aaruush, SRM)

Oct. 2024 – Present

- Developed a RAG based model and trained it on **50+ datasets** with hybrid search technique for optimised context analysis.
- Reduced **response time by 72%** and optimised the approach from Semantic to Hybrid search with **vector DB** storage.
- Mentored as AIML representative for HackSummit'25 for **200+ selected candidates**.

PERSONAL PROJECTS [\[Github URL\]](#)

A.V.A - LLM based RAG based ChatBot finetuned on organization dataset | [Link](#)

LangChain, Python, FastAPI, RAG, OpenAI LLM

- Developed a RAG based model and trained it on **50+ datasets** with hybrid search technique for optimised context analysis.
- Reduced **response time by 72%** and optimised the approach from Semantic to Hybrid search with **vector DB** storage.
- Setup safety guards to prevent prompt injection and data leakage.

JanRakshak - AI-Powered one-stop flood prediction and resilience System | [Link](#)

TypeScript, Python, FastAPI, PostGRE SQL, Firebase, Next, Yolo

- Designed an Full Stack-ML Based website for pre-flood detection using SMOTE and Post flood damage assessment using Yolo.
- Achieved an accuracy of 94.2% in pre-flood model and 97.3% in post-flood model.

LokSetu - Community Driven crowd-sourcing platform | [Link](#)

TypeScript, Python, Supabase,

- Built backend service to support grievance creation, prioritizing, and assignment workflows.
- Implemented image processing to classify infrastructure issues and assign critical feedback

ACHIEVEMENTS

- 1st Position: NASA SAC (Chennai Region) and Global Nominee
- Top 45 internal shortlisting teams: SIH'25
- 1st position: HackTrix '25 (Techvantage.ai and R.E.A.C.H.)
- 2nd Position: Innovatex' 25 (ACM SIGAI, SRM)
- West Bengal Representative: CBSE National Science Exhibition'22

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Generative AI Certification
- NPTEL Fundamentals of Object Oriented Programming (Top 5%)
- Microsoft Introduction to Artificial Intelligence Certificate
- Postman API Fundamentals Student Expert
